Portrait Guide 2018

About Us

We are Adam, Gary, and Anne. Combined, we have over 60 years of professional experience. Our clients include billionaires and teachers, executives of Fortune 500 companies and artists, models and soccer-moms, professional athletes and Monday-morning quarterbacks. What they all have in common is a taste for great photography that is natural, authentic, and personal.

Adam specializes in working with small children, especially ages 2-6 (he's crazy, right?!). His shoots are playful and relaxed in order to let the child really be him or herself! He also loves working with individuals (especially creatives) to capture head shots and portraits that are full of personality.

Anne specializes in lifestyle family photography and newborns. Her style is candid, intimate, and a little raw— just capturing real life, beautiful and messy as it is, as it unfolds in front of her camera. Of course she gives a little direction, too. We all need that perfect “holiday card” photo. :)

Gary specializes in classic portraiture either on-location or in the studio. He works well with both individuals and large groups, he makes everyone feel comfortable, and maybe more importantly, look great!

Families, Children, Newborns, and Seniors

In our portraiture the goal is always to put personality first. We strive to create a relaxed and fun atmosphere where you feel at ease and can be yourself! Then we can capture images that are unique, natural, and authentic... not to mention gorgeous!
